(AUG 2023 – CURRENT)

1) Website Creation :
          I have extensive experience in web development, having created, altered, and modified three websites.
I utilized HTML, CSS, and JavaScript for frontend design, PHP for seamless database connections, and SQL for effective database management. These websites are hosted on Hostinger, and I employed Visual Studio as my IDE for efficient development workflows.

2) CRM :

      I possess significant expertise in crafting, adjusting, and refining Office CRM solutions. Employing PHP for frontend functionality and facilitating database connections, complemented by SQL for robust database management. These systems are hosted on Hostinger, with Visual Studio serving as my preferred IDE for streamlined development processes.
